

DESIGNER COLLECTION DOG BOOTS

All dogs feet vary in size, just like people!

Please use the below instructions to properly measure your dogs feet before you purchase!

Why do dogs need shoes/boots?

- Prevents infections on feet.
- Keeps feet clean while playing outdoors.
- Protects feet from salt/frostbite during the snowy winter season.
- Keeps feet safe from hot or course ground, glass, sand, etc.

How to Measure

- Have your dog stand on a piece of paper.
- Mark the front and back of the foot.

Note:

All four paws should be measured and the largest measurement kept.
The width of the paw should be slightly smaller than the width of the boot.
