effective

Thank you for choosing the Eazee deshedding tool! Please read this instruction sheet carefully before use.

First Time Setup

This tool comes with two reversible combs. The white comb is designed for daily grooming; the black comb is intended for more intense grooming. One side of these combs is for thinner coats. The opposite side is for thicker coats.

To switch combs, advance the button downward as far as it will go. Then slide the comb out of the grooved channel with your other hand. To reverse a comb, slide it out of the channel the same way. Then flip it over and slide it back in.

Instructions

1. If possible, start by bathing your pet and thoroughly drying the entire coat. If your pet has any sores, bruises or skin conditions, consult your veterinarian before using.
2. Advance the button one click forward for pets with short hair, two clicks forward for pets with long hair.
3. Using the tool as if it were a brush, gently sweep it across your pet's coat, following the hair direction. Long, even strokes are most effective.
4. Take extra care around the stomach and avoid sensitive areas such as paws, genitals, ears and mouth. Do not brush the same area repeatedly because this could irritate the skin and living hair. Do not force the tool through the hair.

5. If you can't untangle matted areas easily with gentle strokes, use an appropriate Click & Brush system accessory like the Eazee Dematting Tool PRO9 Medium or Comb PRO38 Medium. Or take your pet to a grooming salon.
6. To eject the loose hair you've collected, simply pull the button all the way back. Because this tool is constructed from anti-static materials, the hair will slide off.

For more deshedding and grooming tips, visit www.eazee.pet.

Care & Maintenance

To extend the life of your Eazee tool, completely retract the comb by sliding the button back all the way after grooming. Do not drop the tool while using to avoid damaging the comb. If the comb is worn or damaged, replacement combs are available. To keep the grooming teeth clean, wash them after every use with plain or soapy water. Let dry before retracting the comb and storing.

100% Satisfaction Guaranteed

If you and your pet aren't delighted with the Eazee deshedding tool, we offer a 30-day money-back guarantee. To download and print a product return form, please visit the www.eazee.pet Contact Us page. Fill out the form, including the reason for your return, and send it along with the complete tool (head, handle and both combs) plus your original paid receipt to:
