NEOVE

Dog

NEOVELA™ (SELAMECTIN)

THE LESS EXPENSIVE ALTERNATIVE TO REVOLUTION®

The active ingredient of Selamectin has proven safety and Efficacy.

- NEOVELA should be applied monthly for dogs with trusted activity against Fleas, Heartworm, Worms, Mites and Lice.
- NEOVELA has the active ingredient, Selamectin, and is applied topically and distributed not only on the hair coat but also absorbed and distributed systemically.
- NEOVELA can be used from age 6 weeks for puppies.
- NEOVELA is approved for used in pregnant, lactating bitches and breeding dogs.
- NEOVELA treats multiple parasites in a single treatment, including 3 stages of the flea life cycle (adults, eggs and larvae).
- NEOVELA for Dogs and puppies is waterproof after two hours of application.

NEOVEON™ PLUS (FIPRONIL AND (S)-METHOPRENE

THE LESS EXPENSIVE ALTERNATIVE TO FRONTLINE® PLUS.

- NEOVEON PLUS kills fleas fast.
- NEOVEON PLUS applied monthly will control the flea population and protect your environment from re-infestations. The easy spot-on treatment kills fleas on your dog, plus flea eggs and larvae in their environment to keep them protected from flea infested environments (such as dog parks)
- NEOVEON PLUS should be applied every two weeks for protection against paralysis ticks (Ixodes holocyclus). Apply NEOVEON PLUS monthly for brown dog tick control (Rhipicephalus sanguineus).
- NEOVEON PLUS Treats and controls flea allergy dermatitis (F.A.D).
- NEOVEON PLUS Controls biting lice.
- NEOVEON PLUS aids in the control of Sarcoptic Mange mites.
- NEOVEON PLUS can safely be used in puppies from 8 weeks of age.
- NEOVEON PLUS is safe for use on breeding, pregnant and lactating bitches.
- NEOVEON PLUS is water fast – so it can be used on dogs that are swimming or shampooed between treatments. Always ensure your dog is completely dry before applying NEOVEON PLUS and wait 48 hours after application before wetting your dog again.
